Field 1:	Temperature	Input:	<input type="checkbox"/>
Field 2:	Humidity	Input:	<input type="checkbox"/>
Field 3:	Light	Input:	<input checked="" type="checkbox"/>
Field 4:		Input:	<input type="checkbox"/>
Field 5:		Input:	<input type="checkbox"/>
Field 6:		Input:	<input type="checkbox"/>
Field 7:		Input:	<input type="checkbox"/>
Field 8:		Input:	<input type="checkbox"/>

Submit

The above rendered page contains the basic customer details along with the Read and Write API for his account.

It is your responsibility to program his devices to the correct APIs

The fields 'Field 1,...Field 8' are the smart devices in customer's home, which is currently restricted to 8.

Once a device is installed it is your responsibility to label them because customers can't access unlabelled devices.

The checkbox Input corresponds to whether the device takes input or not.

Logs:

This page displays the log-in and out time of all the customers.
